

GROVE PRIMARY SCHOOL AND NURSERY SUBTRACTION

Nursery & Reception	Nursery & Reception Subtraction		
	Concrete	Picture	Abstract
<p>Subtraction as counting back or taking away</p> <p>This is perhaps the most intuitive aspect of subtraction. Children can establish how many in a set and then count back as one, two or three objects are removed.</p>	<p>Make the larger number in your subtraction. Use counters and move them away from the group as you take them away counting backwards as you go.</p>  <p>Move the beads along your bead string as you count backwards in ones.</p> 	<p>Count back on a number line or number track</p>  <p>Start at the bigger number and count back the smaller number showing the jumps on the number line.</p>	<p>Put 13 in a pot, count back 4. What number are you at? Use your fingers to help.</p>
Year 1 Subtraction			
	Concrete	Picture	Abstract
<p>Taking away, how many left? Crossing out</p>	<p>Use physical objects, counters, cubes etc. to show how objects can be taken away.</p>  <p>$6 - 2 = 4$</p> <p>$4 - 2 = 2$</p> 	<p>Cross out drawn objects to show what has been taken away.</p>  <p>$15 - 3 = 12$</p>	<p>$18 - 3 = 15$</p> <p>$8 - 2 = 6$</p>

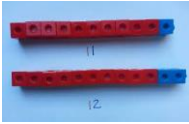

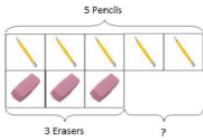

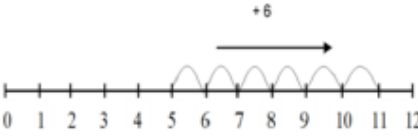

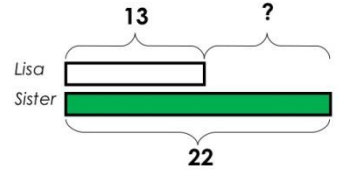

GROVE PRIMARY SCHOOL AND NURSERY

SUBTRACTION

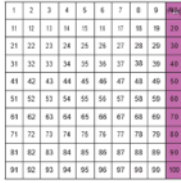

<p>Finding a part, breaking apart</p>	<p>Link to addition- use the part whole model to help explain the inverse between addition and subtraction.</p>  <p>If 10 is the whole and 6 is one of the parts. What is the other part? $10 - 6 =$</p>	<p>Use a pictorial representation of objects to show the part part whole model.</p> 	<p>Move to using numbers within the part whole model.</p> 
<p>Counting back</p>	<p>Make the larger number in your subtraction. Use counters and move them away from the group as you take them away counting backwards as you go.</p>  <p>Move the beads along your bead string as you count backwards in ones.</p> 	<p>Count back on a number line or number track</p>  <p>Start at the bigger number and count back the smaller number showing the jumps on the number line.</p>  <p>This can progress all the way to counting back using two 2 digit numbers.</p>	<p>Put 13 in your head, count back 4. What number are you at? Use your fingers to help.</p>

GROVE PRIMARY SCHOOL AND NURSERY

SUBTRACTION

Subtract a 1-digit number from a 2-digit number – crossing ten

Use a bead string

Steps in subtraction can be recorded on a number line.

Then use number bonds to become more efficient.

$$22 - 7 =$$

$$15 - 7 =$$

Subtract a 2-digit number from a 2-digit number – not crossing ten

Use Base 10 to make the bigger number then take the smaller number away.

$$28 - 13 =$$

Draw the Base 10 or place value counters alongside the written calculation to help to show working.

Use partitioning: $47 - 24 = 23$

$$\begin{array}{r} 40 + 7 \\ - 20 + 4 \\ \hline 20 + 3 \end{array}$$

Column Subtraction:

$$\begin{array}{r} 32 \\ - 12 \\ \hline 20 \end{array}$$

GROVE PRIMARY SCHOOL AND NURSERY

SUBTRACTION

Subtract a 2-digit number from a 2-digit number – crossing ten – subtract ones and tens

Use Base 10 to start with before moving on to place value counters. Start with one exchange before moving onto subtractions with 2 exchanges.

The Empty Number Line

$74 - 27 = 47$ worked by counting back:

or in different order:

Expanded Vertical Method:

Use partitioning:

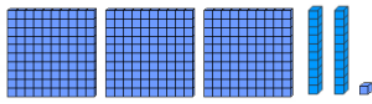

$$\begin{array}{r} 70 + 4 \\ - 20 + 7 \\ \hline \end{array} \quad \begin{array}{r} \overset{60}{70} + \overset{14}{4} \\ - 20 + 7 \\ \hline 40 + 7 \end{array}$$

Column Vertical method:

$$\begin{array}{r} \overset{6}{7} \overset{14}{4} \\ - 27 \\ \hline 47 \end{array}$$

Calculations

$$\begin{array}{r} 234 \\ - 88 \\ \hline \end{array}$$

Now I can take away eight tens and complete my subtraction

Calculations

$$\begin{array}{r} 234 \\ - 88 \\ \hline 146 \end{array}$$

Show children how the concrete method links to the written method alongside your working. Cross out the numbers when exchanging and show where we write our new amount.

GROVE PRIMARY SCHOOL AND NURSERY

SUBTRACTION

Year 5 & 6 Subtraction	
Year 5 & 6	Abstract
Expanded Vertical Method and Compact Vertical Method	<p>Example: $563 - 241$, no adjustment or decomposition needed</p> <p>Expanded method</p> $\begin{array}{r} 500 + 60 + 3 \\ - 200 + 40 + 1 \\ \hline 300 + 20 + 2 \end{array}$ <p style="text-align: right;">leading to</p> $\begin{array}{r} 563 \\ - 241 \\ \hline 322 \end{array}$ <p>Start by subtracting the units, then the tens, then the hundreds. Refer to subtracting the tens, for example, by saying 'sixty take away forty', not 'six take away four'.</p> <p>Example: $563 - 271$, adjustment from the hundreds to the tens, or partitioning the hundreds</p> $\begin{array}{r} 500 + 60 + 3 \\ - 200 + 70 + 1 \\ \hline \end{array}$ $\begin{array}{r} 400 + 160 + 3 \\ - 200 + 70 + 1 \\ \hline 200 + 90 + 2 \end{array}$ $\begin{array}{r} 400 + 160 + 3 \\ - 200 + 70 + 1 \\ \hline 200 + 90 + 2 \end{array}$ $\begin{array}{r} 400 + 160 + 3 \\ - 271 \\ \hline 292 \end{array}$ <p>Begin by reading aloud the number from which we are subtracting: 'five hundred and sixty-three'. Then discuss the hundreds, tens and ones components of the number, and how $500 + 60$ can be partitioned into $400 + 160$. The subtraction of the tens becomes '160 minus 70', an application of subtraction of multiples of ten.</p> <p>$932 - 457$ becomes</p> $\begin{array}{r} 8 \quad 12 \quad 1 \\ 9 \quad 3 \quad 2 \\ - 4 \quad 5 \quad 7 \\ \hline 4 \quad 7 \quad 5 \end{array}$ <p style="text-align: center;">Build up to the most efficient method.</p> <p>Answer: 475</p>
