Measurement

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Measurement	Compare, describe and solve practical problems for: lengths and heights [for example, long/short, longer/shorter, tall/short, double/half]	Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)	Convert between different units of measure [for example, kilometre to metre; hour to minute]	Convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate

Compare, describe	Compare and order	Measure the	Measure and	Understand and	Use, read, write
and solve practical	lengths, mass,	perimeter of simple	calculate the	use approximate	and convert
problems for:	volume/capacity and	2-D shapes	perimeter of a	equivalences	between standard
mass/weight [for	record the results		rectilinear figure	between metric	units, converting

	and solve practical problems for: mass/weight [for	and solve practical problems for: mass/weight [for example, heavy/light, heavier than, lighter than] Compare, describe and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full,	and solve practical problems for: mass/weight [for example, heavy/light, heavier than, lighter than] Compare, describe and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full,	and solve practical problems for: mass/weight [for example, heavy/light, heavier than, lighter than] Compare, describe and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full, and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full, and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full, and solve practical record the results using >, < and = and solve practical using >, < and = Add and subtract amounts of money to give change, using both £ and p in practical contexts Find the area of rectilinear shapes by counting squares calculate the perimeter of simple (including squares) in centimetres and metres Find the area of rectilinear shapes by counting squares	and solve practical problems for: mass/weight [for example, heavy/light, heavier than, lighter than] Compare, describe and solve practical problems for: capacity and record the results using >, < and = Recognise and use and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full, and solve practical problems for: capacity and volume [for example, full/empty, more than, less than, half, half full, lengths, mass, volume/capacity and record the results using >, < and = perimeter of simple 2-D shapes perimeter of a rectilinear figure (including squares) in centimetres and metres Add and subtract amounts of money to give change, using both £ and p in practical contexts Find the area of rectilinear shapes by counting squares calculate the perimeter of a rectilinear figure (including squares) in centimetres and mitted and subtract amounts of money to give change, using both £ and p in practical contexts Find the area of rectilinear shapes by counting squares in centimetres and metric units and common imperial units such as inches, pounds and pints Add and subtract amounts of money to give change, using both £ and p in practical contexts Find the area of rectilinear shapes by counting squares in centimetres and metric units and common imperial units such as inches, pounds and pints

	Compare, describe and solve practical problems for: time [for example, quicker, slower, earlier, later]	Find different combinations of coins that equal the same amounts of money	Tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks	Estimate, compare and calculate different measures, including money in pounds and pence	Calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm2) and square metres (m2) and estimate the area of irregular shapes	Recognise that shapes with the same areas can have different perimeters and vice versa
	Measure and begin to record the following: lengths and heights	Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change	Estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight	Read, write and convert time between analogue and digital 12- and 24-hour clocks	Estimate volume [for example, using 1 cm3 blocks to build cuboids (including cubes)] and capacity [for example, using water]	Recognise when it is possible to use formulae for area and volume of shapes
	Measure and begin to record the following: mass/weight	Compare and sequence intervals of time	Know the number of seconds in a minute and the number of days in each month, year and leap year	Solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days	Solve problems involving converting between units of time	Calculate the area of parallelograms and triangles

Measure and begin to record the following: capacity and volume	Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times	Compare durations of events [for example to calculate the time taken by particular events or tasks]	Use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling	Calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm3) and cubic metres (m3), and extending to other units [for example, mm3 and km3]
Measure and begin to record the following: time (hours, minutes, seconds)	Know the number of minutes in an hour and the number of hours in a day			
Recognise and know the value of different denominations of coins and notes				

Sequence events in			
chronological order			
using language [for			
example, before			
and after, next,			
first, today,			
yesterday,			
tomorrow,			
morning,			
afternoon and			
evening]			
Recognise and use			
language relating			
to dates, including			
days of the week,			
weeks, months and			
years			
Tell the time to the			
hour and half past			
the hour and draw			
the hands on a			
clock face to show			
these times
